# AIRA JOSH C. YNTE

Computer Engineer

08airajosh@gmail.com | +63 993 477 8834 | linkedin.com/in/aira-josh-ynte | aera0908.github.io | Metro Manila, Philippines

## PROFESSIONAL SUMMARY

Computer Engineering graduate and Junior Software Engineer with hands-on experience in full-stack development, software QA, and embedded systems. Passionate about building robust, well-tested systems that bridge hardware and software. Skilled in React, TypeScript, C/C++, Flutter, and system architecture.

## EXPERIENCE

**Junior Software Engineer** 2026 – Present
*Naaxtech*

- Build and maintain full-stack business systems and integrations for clients.
- Write failure-focused tests and run end-to-end QA before every release.
- Ship changes through a staged development, QA, and production workflow.
- Design accessible, responsive interfaces with purposeful motion.

**IC Layout Trainee** June 2026 – September 2026
*Xinyx Design Consultancy and Services Inc. / Xinyx Labs*

- Completed specialized training in IC Layout design, floorplanning, routing, and physical verification (DRC/LVS).

**Freelance Web/Software Developer** Jan 2023 – June 2026
*Various Clients*

- Designed and delivered 5+ high-performance React/TypeScript web apps, reducing initial load times by 35%.
- Integrated interactive Recharts dashboards, plotting 10,000+ telemetry data points under 100ms latency.
- Built secure Web3 signing modules via MetaMask and translated 30+ Figma wireframes to accessible interfaces.

**IC Design Intern (Design & Verification)** June 2025 – August 2025
*Xinyx Design Consultancy and Services Inc.*

- Designed and verified AMBA APB3 peripherals in SystemVerilog, achieving 100% code coverage across 20+ test cases.

## EDUCATION

**Bachelor of Science in Computer Engineering (Magna Cum Laude)** 2022 – July 2026
*Colegio de Muntinlupa — Muntinlupa City, Metro Manila, Philippines*

- Specialized in Software Architecture & System Design; coursework in databases, computer networks, DSP, and simulation.
- Awarded Best Thesis for capstone project "AeroVit", a gamified AI fitness platform (see Key Projects).

## KEY PROJECTS

**AeroVit — Gamified AI Fitness Platform (Thesis Project)** Awarded Best Thesis 2024 – 2026

- Built ESP32-S3 FreeRTOS smartwatch firmware that tracks and streams heart rate and SpO2 biometrics over BLE.
- Built a Flutter mobile app utilizing MediaPipe BlazePose (33 landmarks) for real-time posture tracking and AI form coaching.
- Coded Flame 2D game and Solidity smart contracts on Sepolia supporting ERC-20 withdrawals with 5% burn.

**Fehuvia — Open Finance B2B SME Treasury Workstation** 2026

- Developed a B2B treasury workstation to streamline SME cash flow management, reducing obligation processing times by 40%.
- Integrated secure Web3 transaction signing to automate and accelerate business settlements to under 2 seconds.
- Engineered a robust backend to synchronize on-chain transaction logs, maintaining 99.9% financial data consistency.

**StickOut — Interactive VLSI EDA Editor** 2026

- Created HTML5 Canvas EDA viewport with coordinate transforms and grid snapping, rendering layouts at 60 FPS.
- Coded same-layer wire auto-bridging algorithm to resolve crossovers and short-circuits in under 5ms.
- Built double-pass regex parser and canvas rendering engine to render LaTeX subscripts (e.g. V_{DD}) in real-time.

## SKILLS & COMPETENCIES

**Software Development & Architecture:** Clean architecture, API engineering, database design, system integrations, optimization

**QA & Testing:** Adversarial testing, unit, integration & end-to-end testing, mobile stress testing, staged release QA

**UI/UX & Motion:** Wireframing, accessible interaction design, motion design, responsive layouts

**Embedded & Hardware Engineering:** IC Layout & physical verification (DRC/LVS), digital logic verification, RTOS firmware, PCB bring-up

**Technical Stack:** TypeScript, JavaScript, C/C++, Python, SQL (PostgreSQL, MySQL, SQLite), React, Next.js, Express, Node.js, Flutter, Tailwind CSS, GSAP, Solidity, SystemVerilog, Vitest, Playwright, Maestro, Git, Docker, Figma, KiCad, Firebase, MongoDB

## CERTIFICATIONS & TRAINING

AI Fluency (Anthropic) · Model Context Protocol: Foundations & Advanced (Anthropic) · The AI Engineer Path (Scrimba) · Blockchain4Youth (Bitget) · On-the-Job Training Certificate (Xinyx Design) · Learn React & TailwindCSS (Scrimba) · TINA Design Suite (Hytec Power) · Understanding EDR (Cybersecurity) · Introduction & Intermediate Git (DataCamp)
