

AIRA JOSH C. YNTE

Data Engineer · Data & Telemetry Systems

08airajosh@gmail.com | +63 993 477 8834 | linkedin.com/in/aira-josh-ynnte | aera0908.github.io | Metro Manila, Philippines

PROFESSIONAL SUMMARY

Computer Engineering graduate (Magna Cum Laude) specializing in data engineering, telemetry pipelines, and database architecture. Hands-on experience designing real-time event-driven ETL/ELT pipelines, high-frequency time-series data ingestion, and optimizing relational schemas. Proficient in SQL (PostgreSQL, MySQL), Python (Pandas, NumPy), Docker, and building analytical telemetry dashboards.

EXPERIENCE

IC Layout Trainee

June 2026 – Present

Xinyx Design Consultancy and Services Inc. / Xinyx Labs

- Analyzing physical verification rule decks and parasitic extraction (PEX) data to validate circuit geometries and timing margins.
- Processing netlist structural data and layout reports to ensure DRC/LVS database integrity across physical design runs.

IC Design Intern (Design & Verification)

June 2025 – August 2025

Xinyx Design Consultancy and Services Inc.

- Designed and verified AMBA APB3 bus communication interfaces using SystemVerilog, processing 50+ simulation log datasets.
- Built automated verification scripts to parse waveform trace data and validate timing constraints with 100% test coverage.

EDUCATION

Bachelor of Science in Computer Engineering (Magna Cum Laude)

2022 – July 2026

Colegio de Muntinlupa — Muntinlupa City, Metro Manila, Philippines

- Coursework: Database Management Systems, Data Structures & Algorithms, Computer Networks, Software Architecture, DSP.
- Awarded Best Thesis for capstone project "AeroVit" (Gamified AI Fitness Platform with real-time biometric telemetry pipelines).

KEY PROJECTS (DATA ENGINEERING & ANALYTICS)

AeroVit — Real-Time Telemetry & AI Analytics Platform (Thesis Project)

Awarded Best Thesis

2024 – 2026

- Engineered real-time telemetry ingestion pipeline streaming 50Hz IMU/PPG biosensor data from ESP32-S3 over BLE with 98% packet reliability.
- Processed 33 real-time MediaPipe BlazePose skeletal landmarks per frame at 30+ FPS, translating coordinate arrays into kinematic form metrics.
- Designed on-chain transaction sync pipeline with Sepolia smart contracts, logging token distributions and auditing burn transactions.

Fehuvia — Event-Driven B2B Treasury & Financial Data Pipeline

2026

- Built an event-driven daemon in Node.js/PostgreSQL to ingest and synchronize L2 blockchain transaction logs in real-time with 99.9% consistency.
- Developed an automated document parsing ETL pipeline utilizing OpenAI GPT-4o OCR, achieving 98.2% extraction accuracy for invoice data.
- Created interactive Recharts analytics dashboards to visualize corporate cash flow forecasting, accounts payable aging, and liquidity trends.

Plant.io — IoT Time-Series Telemetry & Analytics Dashboard

2025

- Built real-time multi-sensor telemetry pipeline ingesting continuous soil moisture, pH, and temperature metrics via Firebase Realtime Database.
- Formulated automated data aggregation routines to track daily environmental trends, trigger automated alerts, and minimize pipeline latency.

SKILLS & COMPETENCIES

Data Engineering & Pipelines: ETL/ELT pipeline design, event-driven ingestion, real-time telemetry streaming, schema design & normalization, REST API engineering

Databases & Storage: PostgreSQL, MySQL, SQLite, MongoDB, Firebase (Firestore, Realtime DB), ChromaDB (Vector Store), Redis, indexing & query tuning

Data Analysis & Processing: Python (Pandas, NumPy, Matplotlib), SQL (CTEs, Window Functions, Complex Joins), Time-series analysis, RAG pipelines, data cleaning

Languages & Frameworks: Python, SQL, TypeScript, JavaScript, C/C++, SystemVerilog, Node.js, Express, React, Flutter, Tailwind CSS, Solidity

Tools & Infrastructure: Docker, Git, GitHub Actions, Linux/Bash, Postman, Vite, KiCad, Figma, Google Cloud Platform basics

CERTIFICATIONS & TRAINING

AI Fluency: Framework & Foundations (Anthropic) · Introduction & Advanced Model Context Protocol (Anthropic) · The AI Engineer Path (Scrimba) · On-the-Job Training Certificate (Xinyx Design) · Blockchain4Youth (Bitget) · Introduction & Intermediate Git (DataCamp) · Understanding EDR Cybersecurity
