

AIRA JOSH C. YNTE

CURRICULUM VITAE

Frontend Developer & UI Engineer · Web & Mobile Applications

08airajosh@gmail.com | linkedin.com/in/aira-josh-ynte | Metro Manila, Philippines

PROFESSIONAL SUMMARY

Detail-oriented Computer Engineering graduate (Expected July 2026) specializing in frontend development, UI/UX engineering, and responsive web applications. Driven to bridge the gap between visually stunning design aesthetics and performant, robust client-side architecture. Committed to building interactive, accessible, and fluid user experiences using modern libraries like React 19, TypeScript, Tailwind CSS, React Three Fiber, GSAP, and Framer Motion.

EDUCATION

Bachelor of Science in Computer Engineering (Magna Cum Laude)

2022 – July 2026 (Expected)

Colegio de Muntinlupa — Muntinlupa City, Metro Manila, Philippines

Specialization: Software Architecture & System Design

- Core coursework: Software engineering, user interface design, database systems, computer network structures, system simulation.
- Focused projects on real-time data visualization, client-side state machine integration, and responsive layout designs.
- Designed a muscle bio-signal telemetry web controller on the ESP32, translating hardware signals into fluid canvas charts.

PROFESSIONAL EXPERIENCE

Freelance Frontend Developer

2023 – Present

Various Clients

- Designed and implemented responsive, high-performance web applications using React/Vite, Tailwind CSS, and TypeScript.
- Integrated complex interactive charts and graphs using Recharts, visualizing high-density telemetry and cashflow runtimes.
- Built secure browser-side Web3 signing modules using EIP-1193 MetaMask standards to manage client-side transactions safely.
- Collaborated directly with business stakeholders to translate Figma design mockups into pixel-perfect, accessible React interfaces.
- Optimized client-side rendering speed, state management, and asset loading to reduce average initial page load times.
- Managed iterative stakeholder feedback cycles, implementing quick frontend enhancements and carrying out clean code handovers.

IC Design Intern (Design & Verification)

2025

Xinyx Design Consultancy and Services Inc.

- Designed and verified peripheral interfaces (AMBA APB3) using SystemVerilog, analyzing waveforms and simulation logs.
- Gained hands-on experience mapping logic layouts and verifying timing constraints in behavior simulations.

PROJECTS

The Safehouse — Community Showcase & Pitch Site

2025 – Present

Role: Frontend & 3D Web Developer

- Built an interactive 3D valley journey scene in React Three Fiber with procedural terrain generation and camera path tracking.
- Wired GSAP timelines and ScrollTrigger to Lenis smooth scroll, choreographing 13 narrative scroll sections.
- Implemented accessibility-first MotionModeContext to respect user motion preferences, providing static CSS fallbacks.
- Integrated interactive Rive vector animations, split-heading reveals, and parallax components for narrative storytelling.

Stack: React 19, Vite, Tailwind CSS 4, Three.js, @react-three/fiber, GSAP, Framer Motion, Lenis, Rive

Fehuvia — Open Finance B2B SME Treasury Workstation

2026

Role: Lead Web3 & Full-Stack Developer

B2B treasury workstation featuring a custom glassmorphic interface, interactive cashflow metrics, AI invoice digitization drawer, and a browser-side cryptocurrency transaction panel.

- Designed a modern, responsive glassmorphic dashboard in React 19 and Tailwind CSS, utilizing custom theme-context models.
- Integrated complex interactive charts and graphs using Recharts, visualizing cashflow runtimes and runway metrics.
- Programmed browser-side Web3 signing modules using EIP-1193 MetaMask standards to preserve zero-custody on transactions.
- Built interactive billing drawers, slide-out modal systems, and responsive form validation components for invoice digitization.

Stack: React 19, Vite, Tailwind CSS, Recharts, Express, PostgreSQL, OpenAI GPT-4o, Ethers.js, Solidity

Plant.io — 8-Bit IoT Nursery Dashboard

2025

Role: Full-Stack Mobile & IoT Developer · Freelance

Cross-platform Flutter dashboard featuring a Y2K/8-bit retro dark terminal aesthetic, real-time sensor plots, and plant-health scoring.

- Created a Y2K/8-bit retro dark-mode user interface in Flutter using Press Start 2P typography and custom pixel-art assets.
- Coded custom canvas-based CRT scanline filters, pixelated borders, and animated plant avatars representing system health.
- Formatted real-time data plots with fl_chart, implementing responsive line, bar, and pie charts for sensor trends.
- Optimized local state updates and transition animations to keep user commands responsive, with command latency under 150ms.

Stack: Flutter, Dart, Provider, Firebase Realtime DB, Cloud Firestore, fl_chart, Open-Meteo API

Manhwa Reader — Web Application

2026

Role: Frontend Developer · Personal Project

- Created a single-page web application in React 19, TypeScript, and Tailwind CSS to browse and read manga via MangaDex API.
- Designed custom dark/light color themes with local storage persistence and fluid transitions.
- Formulated defensive UI states (loading spinners, empty slots, error notifications) to handle inconsistent API payloads.
- Deduplicated chapter lists and optimized image loading times, selecting chapters with rich page coverage dynamically.

Stack: React 19, TypeScript, Vite, React Router DOM, Tailwind CSS, MangaDex API

Student Consultation System

2025

Role: Full-Stack Developer · Freelance

- Designed role-based dashboard layouts in React/Vite supporting distinct interactive views for students, professors, and admins.
- Formulated a highly interactive consultation scheduling calendar, featuring custom grid structures and drag-and-drop actions.
- Built the user interface for real-time messaging, including attachments drawers, image crop-and-previews, and status indicators.
- Implemented client-side routing, protected navigation guards, and global user-profile state using React context.

Stack: React, TypeScript, Vite, Tailwind CSS, Node.js, Express, PostgreSQL, JWT, Multer, Sharp

Walang Basagan ng Thrift — E-Commerce Platform

2025

Role: Full-Stack Web Developer · Freelance

- Created Y2K storefront design in React 19/Tailwind, incorporating rounded container grids and a custom pink-white palette.
- Built interactive shopping cart drawers, catalog filter bars, and modal-based order history reports.
- Coded admin dashboard for product CRUD, user list moderation, order tracking, and customer support threads.

Stack: React 19, TypeScript, Vite, Tailwind CSS, React Router, Node.js, Express, SQLite

TECHNICAL SKILLS

Frontend Development: React, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Three.js, @react-three/fiber, Framer Motion, GSAP, Flutter, Rive, Recharts, fl_chart

Programming Languages: TypeScript, JavaScript, SQL (PostgreSQL, MySQL, SQLite), Python, C/C++

Backend & Databases: Node.js, Express, PostgreSQL, MySQL, SQLite, MongoDB, Firebase (Firestore, Realtime DB, Cloud Functions)

Tools & Design: Git, Vite, Figma, Adobe Suite, Docker, GitHub Actions, Vercel, Render, REST APIs, JWT, MetaMask, Postman, Webpack

CERTIFICATIONS & TRAINING

- **Learn React Certificate** — Scrimba
- **Learn TailwindCSS Certificate** — Scrimba

- **The AI Engineer Path Certificate** — Scrimba
- **Basic Web Development Workshop** — Zuitt
- **On-the-Job Training Certificate** — Xinyx Design Engineering, Inc.
- **Understanding EDR: Protecting Endpoints Against Modern Threats** — Cybersecurity

SOFT SKILLS & COMPETENCIES

- Detail-oriented execution across client-side component architecture and UI layout design.
- Translating business and wireframe requirements into structured responsive layouts and frontend plans.
- Structured troubleshooting across client interfaces, layout alignments, and rendering performance.
- Effective client management with iterative stakeholder design feedback cycles.
- Self-directed upskilling on modern, advanced frontend libraries and tools.
