

AIRA JOSH YNTE

Muntinlupa, Metro Manila 1772 | aera0908.github.io

+63 993-477-8834 | 08airajosh@gmail.com

Detail-oriented Computer Engineering student with strong general computer skills and proficiency in the Microsoft Office Suite. Possesses a solid technical foundation in database management and software troubleshooting, combined with the ability to adapt quickly to new digital tools. Reliable and efficient, seeking to utilize above-average technical literacy to support operational and administrative goals.

TECHNICAL SKILLS

- **Hardware & Architecture:** Microprocessor Architecture, Logic Circuits, System Analysis, and Logic Design.
 - **Software Development:** Object-Oriented Programming (OOP), Data Structures & Algorithms, and Full-Stack Web Development.
 - **Technologies & Tools:** React, Tailwind CSS, Flutter, ESP32, Firebase, and Microsoft Office Suite.
 - **Database & Systems:** Database Management Systems (DBMS) and Operating Systems.
 - **Diagnostics:** Advanced Computer Diagnostics and Hardware Troubleshooting.
-

EXPERIENCE

IC DESIGN ENGINEER INTERN

Xinyx Design Consultancy and Services Inc. | Muntinlupa, Metro Manila

JUNE 2025 – AUGUST 2025

- Completed a 300-hour intensive technical internship focused on digital electronics and circuit architecture.
- Conducted rigorous logic simulation and verification of integrated circuit designs to ensure system reliability.
- Collaborated with senior engineers to troubleshoot and optimize hardware implementation protocols.

FREELANCE WEB DEVELOPER & DESIGNER

Remote / Self-Employed

2023 – PRESENT

- Develop custom websites for small business clients, focusing on responsive design and brand identity.
 - Manage end-to-end web projects, from client requirements to deployment and system maintenance.
 - Relevant Skills: Web Administration, Client Communication, UI/UX Logic.
-

NOTABLE PROJECTS

AeroVit (Gamified Fitness System)

- Developed a gamified fitness project involving an ESP32-S3 smartwatch that functions as a hardware crypto wallet.
 - Built a Flutter mobile app integrated with an AI coaching system using Reinforcement Learning and BlazePose for movement tracking.
 - Maintains the project's web presence at aerovit.dev.
-

Plant.io (IoT Plant Monitoring System)

- Designed the software infrastructure and Firebase database for an automated plant monitoring system.
- Handled the communication logic between ESP32 hardware and the mobile application to monitor environmental metrics.

Student Consultation Booking System

- Engineered a full-stack booking system to facilitate scheduling between students and faculty members.
- Managed all project components, including frontend UI, backend logic, and database architecture.

Clinic Booking System

- Developed a comprehensive appointment management system for clinical environments.
 - Handled all parts of the development cycle, focusing on secure record management and user-friendly scheduling.
-

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER ENGINEERING

Colegio de Muntinlupa

EXPECTED GRADUATION: 2026

- **Relevant Coursework:** Operating Systems, Database Management Systems (DBMS), Microprocessor Systems, Data Structures & Algorithms, Logic Circuits.

SECONDARY EDUCATION

Muntinlupa Science High School (2016 – 2022)

CERTIFICATIONS & AFFILIATIONS

- **Technical Certifications:** Completed professional training in Web Development, React, Tailwind CSS, and AI Engineering through Zuit and Scrimba.
 - **Affiliation:** Active member of **ICpEP.SE Colegio de Muntinlupa** (Institute of Computer Engineers of the Philippines - Student Edition).
-
