

AIRA JOSH C. YNTE

CURRICULUM VITAE

Software Engineer & System Architect

08airajosh@gmail.com | linkedin.com/in/aira-josh-ynte | Metro Manila, Philippines

PROFESSIONAL SUMMARY

Detail-oriented Computer Engineering graduate (Expected July 2026) with a strong passion for software engineering, system architecture, and technical problem-solving. Adaptable and eager to contribute to high-performing engineering teams, with a proven track record of delivering collaborative projects and freelance solutions. Committed to applying structured engineering principles to design, build, and scale reliable application software.

EDUCATION

Bachelor of Science in Computer Engineering

2022 – July 2026 (Expected)

Colegio de Muntinlupa — Muntinlupa City, Metro Manila, Philippines

Specialization: Software Architecture & System Design

- Core coursework: Software engineering, database structures, computer networks, object-oriented design, operating systems, and computer architecture.
- Hands-on programming and system integration projects focusing on clean code, software life cycles, and responsive user interfaces.
- Academic Capstone: AeroVit — a multi-platform fitness ecosystem spanning mobile app (Flutter), embedded wearable, and Web3 reward token structures.

PROFESSIONAL EXPERIENCE

Freelance Software Developer

2023 – Present

Various Clients

- Formulated PostgreSQL database schemas utilizing optimized subquery indexes, decreasing read queries on dashboard metrics by 40% for active projects.
- Coded secure Web3 wallet signing integration modules using EIP-1193 MetaMask standards for client-side transaction signature verifications.
- Built and deployed RESTful microservices in Node.js/Express with token authorization (JWT), rate-limiting middleware, and audit log modules.
- Collaborated directly with stakeholders through iterative feedback cycles to design clean user interfaces and carry out smooth code handovers.
- Integrated non-custodial and custodial cryptocurrency payment gateways for e-commerce platforms.

IC Design Intern (Design & Verification)

2025

Xinyx Design Consultancy and Services Inc.

- Designed and verified AMBA APB3-compliant peripheral interfaces using SystemVerilog RTL, writing testbenches that verified timing constraints during logic simulation.
- Applied structured debugging and analytical troubleshooting methodologies to isolate design logic issues.
- Completed comprehensive training in industry-standard circuit design and verification flows.

PROJECTS

AeroVit — Gamified AI Fitness Platform

2024 – 2026

Role: Lead Developer & Hardware Engineer

- Developed a cross-platform mobile application in Flutter (Dart) using Provider state management and local storage.
- Built a 33-landmark MediaPipe BlazePose pipeline with EMA noise-filtering and joint-angle state machines for real-time form tracking.
- Designed custom smartwatch PCBs using ESP32-S3 and routed traces for BLE 5.0 and sensor interfaces.
- Deployed AERO ERC-20 token rewards on Sepolia Testnet with an off-chain ledger sync and 5% token burn on withdrawal.

Stack: ESP32-S3, Flutter/Dart, Firebase, MediaPipe, BLE 5.0, Next.js, Ethereum Sepolia, ERC-20

Fehuvia — Open Finance B2B SME Treasury Workstation

2026

Role: Lead Web3 & Full-Stack Developer

B2B treasury workstation featuring an automated background gas faucet, real-time event listener daemon for financial auditing, and GPT-powered invoice parsing.

- Built an Express.js backend integrating context-aware GPT-4o RAG and ChromaDB, parsing uploaded invoice PDFs with 98.2% accuracy.
- Designed real-time Node.js listener daemon syncing smart contract events to PostgreSQL, maintaining financial state consistency.
- Created modern glassmorphic dashboard in React 19 / Tailwind, utilizing Recharts to visualize cashflow runtimes.
- Implemented client-side signing modules using MetaMask (EIP-1193) to preserve zero-custody principles on transactions.

Stack: React 19, Vite, Tailwind CSS, Recharts, Express, PostgreSQL, OpenAI GPT-4o, Ethers.js, Solidity

Plant.io — 8-Bit IoT Nursery Dashboard

2025

Role: Full-Stack Mobile & IoT Developer · Freelance (NDA)

- Built real-time multi-device monitoring for soil moisture, temperature, humidity, EC, and pH sensors from ESP32 nodes.
- Configured low-latency commands over Firebase Realtime DB to actuate water pumps and fans in under 150ms.
- Created offline-first telemetry caching layer using SharedPreferences, implementing local push alerts.

Stack: Flutter, Dart, Provider, Firebase Realtime DB, Cloud Firestore, ESP32

Student Consultation System

2025

Role: Full-Stack Developer · Freelance (NDA)

- Developed role-based dashboards in React/Vite supporting distinct scheduling channels for students, professors, and admins.
- Secured system endpoints with JWT authentication, bcrypt password hashing, and parameterized SQL queries to prevent SQL injections.
- Integrated Sharp image-processing pipeline to crop, compress, and cache user profile photos, reducing asset size by 65%.

- Implemented real-time in-app messaging capabilities enabling student-professor chats with file attachments (Multer backend).

Stack: React, TypeScript, Vite, Tailwind CSS, Node.js, Express, PostgreSQL, JWT, Multer, Sharp

The Safehouse — Community Showcase & Pitch Site

2025 – Present

Role: Frontend & 3D Web Developer

- Built interactive 3D journey scene in React Three Fiber with procedural terrain rendering and camera motion tracking.
- Wired GSAP timelines and ScrollTrigger to Lenis smooth scroll for 13 narrative scroll sections.
- Implemented accessibility-first MotionModeContext with static HTML/CSS fallbacks to respect user motion preferences.

Stack: React 19, Vite, Tailwind CSS, Three.js, @react-three/fiber, GSAP, Framer Motion, Lenis, Rive

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, C/C++, SQL (PostgreSQL, MySQL, SQLite), Dart, Solidity, SystemVerilog, HTML5, CSS3

Frontend & Mobile: React, Next.js, Flutter, Tailwind CSS, Bootstrap, Three.js, @react-three/fiber, GSAP, Framer Motion, Recharts

Backend & Databases: Node.js, Express, PostgreSQL, MySQL, SQLite, MongoDB, Firebase (Firestore, RTDB, Cloud Functions), REST APIs, JWT

Tools & Environments: Git, GitHub, Vite, Docker, GitHub Actions, Postman, Linux, Figma, Adobe Suite, Multer, Sharp, hardhat, Ethers.js

Embedded & Systems: ESP32-S3 bring-up, microcontroller prototyping, BLE 5.0, KiCad (PCB design), Fusion 360, digital logic verification

CERTIFICATIONS & TRAINING

- **Learn React Certificate** — Scrimba
- **Learn TailwindCSS Certificate** — Scrimba
- **The AI Engineer Path Certificate** — Scrimba
- **Basic Web Development Workshop** — Zuiitt
- **On-the-Job Training Certificate** — Xinyx Design Engineering, Inc. (Digital logic verification focus)
- **TINA Design Suite Workshop** — Hytec Power & Inc. (Circuit design & simulation)
- **Understanding EDR: Protecting Endpoints Against Modern Threats** — Cybersecurity

SOFT SKILLS & COMPETENCIES

- Detail-oriented execution across software development life cycles.
- Cross-functional collaboration and team cooperation on academic and freelance projects.
- Freelance client communication and iterative feedback coordination.
- Structured troubleshooting and analytical logic-driven problem-solving.
- Adaptable self-directed upskilling when project requirements evolve.
