

AIRA JOSH C. YNTE

Software Engineer & System Architect

08airajosh@gmail.com | linkedin.com/in/aira-josh-ynnte | Metro Manila, Philippines

PROFESSIONAL SUMMARY

Detail-oriented Computer Engineering graduate (Expected July 2026) with a strong passion for software engineering, system architecture, and technical problem-solving. Adaptable and eager to contribute to high-performing engineering teams, with a proven track record of delivering collaborative projects and freelance solutions. Committed to applying structured engineering principles to design, build, and scale reliable application software.

EXPERIENCE

Freelance Software Developer

2023 – Present

Various Clients

- Built Node.js/Express REST APIs secured with JWT, rate-limiting, and validation, optimizing PostgreSQL databases to reduce query latency by 40%.
- Coded client-side Web3 signing modules using EIP-1193 MetaMask standards to achieve secure, zero-custody transaction workflows.
- Collaborated directly with business stakeholders to translate requirements into responsive, interactive React/Vite interfaces.

IC Design Intern (Design & Verification)

2025

Xinyx Design Consultancy and Services Inc.

- Designed and verified AMBA APB3-compliant peripheral interfaces using SystemVerilog, implementing testbenches that verified timing constraints and data lines during behavioral simulations.

EDUCATION

Bachelor of Science in Computer Engineering

2022 – July 2026 (Expected)

Colegio de Muntinlupa — Muntinlupa City, Metro Manila, Philippines

- Focusing on Software Architecture & System Design; coursework in software engineering, database systems, computer network structures, and object-oriented design.

KEY PROJECTS

AeroVit — Gamified AI Fitness Platform

2024 – 2026

- Designed custom ESP32-S3 smartwatch PCB streaming heart-rate and IMU biosensor telemetry over BLE 5.0.
- Built MediaPipe BlazePose pipeline for real-time tracking, and deployed AERO ERC-20 reward tokens on Sepolia.

Fehuvia — Open Finance B2B SME Treasury Workstation

2026

- Built Express/React dashboard with OpenAI GPT-4o PDF parsing (98.2% accuracy) and Recharts metrics.
- Coded real-time Node.js listener syncing smart contract events to PostgreSQL for data consistency.

Plant.io — 8-Bit IoT Nursery Dashboard (Freelance)

2025

- Developed cross-platform Flutter dashboard displaying real-time sensor telemetry from ESP32 nodes.
- Configured remote relay actuator controls over Firebase Realtime DB with response times under 150ms.

Student Consultation System (Freelance Project)

2025

- Developed role-based dashboards in React/Vite secured with JWT auth, bcrypt, and parameterized SQL queries.
- Integrated Sharp image-processing pipeline, reducing profile photo asset sizes by 65%.

SKILLS & COMPETENCIES

Languages: TypeScript, JavaScript, SQL (PostgreSQL, MySQL, SQLite), Python, C/C++, HTML5, CSS3

Frameworks & Frontend: React, Next.js, Flutter, Tailwind CSS, Bootstrap, Recharts, Redux

Backend & Databases: Node.js, Express, PostgreSQL, MySQL, SQLite, MongoDB, Firebase (Firestore, RTDB, Cloud Functions)

Tools & Environments: Git, GitHub, Vite, Docker, GitHub Actions, REST APIs, JWT, Postman, Linux, Figma, Adobe Suite

Soft Skills: Structured troubleshooting, client communication, database planning, cross-functional collaboration, technical layout, rapid upskilling

CERTIFICATIONS & TRAINING

Learn React (Scrimba) · Learn TailwindCSS (Scrimba) · The AI Engineer Path (Scrimba) · Basic Web Development Workshop (Zuitt) · On-the-Job Training Certificate (Xinyx Design Engineering) · Understanding EDR Cybersecurity
